ORCHID JUNGLE

Route 1, Box 230 Homestead, Fla.

Orchid Seed List # 1

This seed, now ready or soon available, includes some of the best crosses we have ever made.

The parents are exceptionally fine varieties, selected for their high quality over a long period of years, and chosen from thousands of plants. For example, C Trianae var Naranja is the largest, best held, light-colored trianae we have seen. Its broad, heavy petals are deeply ruffled, light mauve; the lip is large, round, brilliant rose, with deep yellow in throat. The plant is strong and vigorous in growth. It was the trianae parent of BLC Dorothy Fennell, one of the best Brasso-laelio-cattleyas ever produced. C Trianae var Naranja is potent in passing on its substance, petal shape, ruffling and winter flowering habit.

C Trianae var Mary Fennell is one of the best dark trianae we have seen. It has fine shape, broad round petals, dark rose-lavender, with deeper blotches in the petal tips. The lip is round, very dark and brilliant, with attractive yellow markings. Strong grower.

We have kept and used the above plants for the past 40 years, consistently refusing to sell any of them, in spite of many and generous offers.

Our selections of BLC Dorothy Fennell parents from the 1200 plants of this cross that we have flowered during the past nine years, all are exceptionally fine plants. These plants average very high in vigor, size and flower quality. They range in color from nearly pure white to very dark. Over half the plants bloomed are of exceedingly high show quality.

In fact, all parents used in these crosses were the best we could find.

Seed is sold in generous packets, each containing enough to plant from 10 to 15 large flasks.

As soon as a pod ripens, we carefully prepare the seed and keep it under refrigeration until it is sent to you. These crosses are made primarily for our own use, and we plant some of each lot, selling only the surplus.

We suggest that you make your selections from the following list, enclosing 75% of the value with your order. We will send you the seed as it ripens, billing you for the balance due us. While we cannot guarantee to fill all orders, the supply being limited so that we may be sold out on some numbers, we hope to fill more than 90% of orders.

SEED LIST # 1

1. C Trianae var Naranja 4403 X BLC Dorothy Fennell 4401 Per packet \$12.50

4403 - This trianae, one of the original parents of Dorothy Fennell, is as described above, with exceptionally fine color, petal shape and substance.

4401 - An excellent BLC Dorothy Fennell, very floriferous, with dark, well held flowers of great substance. Lip large and dark. Pod was on trianae over 13 months.

SEED LIST # 1

1. C. Trianae var. Natanja 4403 X BIC Dorothy Fennell 4401 Per packet \$12.50

4403 - This trianae, one of the original parents of Dorothy Fennell, is as described above, with exceptionally fine color, petal shape and substance.

4401 - An excellent BIC Dorothy Fennell, very floriferous, with dark, well held flowers of great substance. Lip large and dark. Pod was on trianae over 13 months.

- | | <u>Per Packet</u> |
|---|-------------------|
| 2. <u>C. Schroderae</u> X <u>C Aurantiaca</u> | \$ 7.50 |
| 3980 - A good <u>Schroderae</u> , light sepals and petals; large, round lip.
<u>C Aurantiaca</u> - Small, brilliant orange, cluster cattleya. This cross should produce some nice orange flowers similar to LC G S Ball. | |
| 3. <u>BLC Alfred Mollet var Vivid 45117</u> X <u>BLC Dorothy Fennell 45121</u> | 15.00 |
| 45117 - large, bold, dark flower of great substance, brilliant color.

45121 - beautifully shaped <u>Dorothy Fennell</u> , bright medium mauve; ruffled petals and sepals; dark, bright lip with two prominent yellow blotches. This BLC parent back on a specially good <u>Dorothy Fennell</u> should produce some handsome blooms. | |
| 4. <u>BL Helen</u> X <u>C Mossiae</u> | 10.00 |
| This <u>Helen</u> , nearly white, with petals and sepals tinted greenish yellow, has large, lacy lip with delicate pink shading. Large showy blooms.

The <u>C Mossiae</u> is a good flower of medium color, excellent shape. | |
| 5. <u>BLC Dorothy Fennell 45115</u> X <u>BLC The Baroness</u> | 15.00 |
| 45115 - A truly gorgeous <u>Dorothy Fennell</u> , sepals and petals white, edged with lavender; lip bright rose, gold-veined.

The <u>Baroness</u> - sepals and petals light yellow, edged with lavender; lip very large, ruffled, nearly white. This cross should produce unusually fine orchids. | |
| 6. <u>BLC Dorothy Fennell 45126</u> X <u>C Bowringiana 45110</u> | 12.50 |
| 45126 - A large, bold, well-shaped <u>Dorothy Fennell</u> of great substance. Dark mauve; large lip, marked with brilliant yellow.

45110 - This <u>Bowringiana</u> parent very strong, carrying 18 dark - almost violet - flowers on a single spike. This cross should produce excellent, commercial flowers. | |
| 7. <u>BLC Dorothy Fennell 45140</u> X <u>C Portia 45143</u> | 12.50 |
| 45140 - Specially strong growing <u>Dorothy Fennell</u> ; sepals and petals wide, nearly white; large lip, gold and rose.

45143 - Cluster of good dark flowers on the <u>Portia</u> (C Labiata X C Bowringiana). This cross should throw a wide variation of shadings: dark, light and intermediate, producing a strong growing commercial type. | |
| 8. <u>BLC Dorothy Fennell 45134</u> X <u>L. Anceps 45135</u> | 5.00 |
| 45134 - Sepals and petals light mauve; lip dark.

45135 - <u>L Anceps</u> of a good dark variety. | |
| 9. <u>L. Anceps 45146</u> X <u>C Trianae 45148</u> | 2.50 |
| Good varieties of winter-flowering species. | |
| 10. <u>L Anceps 45146</u> X <u>Brassavola glanca alba 45147</u> | 1.00 |
| Too small for commercial use but should have good color and substance. | |

WHILE WE TAKE EVERY PRECAUTION TO SHIP ONLY THE HIGHEST QUALITY SEED, OBVIOUSLY WE CAN MAKE NO GUARANTEES AS TO THE RESULTS YOU MAY OBTAIN FROM THEM.

Per packet
\$ 7.50

2. C. Schrobortera X C. Aurantiaca

3980 - A good Schrobortera, light sepals and petals; large, round lip.
C. Aurantiaca - Small, brilliant orange, cluster cattleya. This cross should
produce some nice orange flowers similar to LC 2 Ball.

3. HIC Alfred Mollat var Vivid 45119 X HIC Dorothy Fennell 45121

45119 - large, bold, dark flower of great substance, brilliant color.
45121 - beautifully shaped Dorothy Fennell, bright medium mauve; ruffled petals
and sepals; dark, bright lip with two prominent yellow blotches. This HIC parent
back on a specially good Dorothy Fennell should produce some handsome blooms.

4. HIC Helen X C. Mossiae

This Helen, nearly white, with petals and sepals tinted greenish yellow, and
large, lacy lip with delicate pink shading. Large showy blooms.
The C. Mossiae is a good flower of medium color, excellent shape.

5. HIC Dorothy Fennell 45118 X HIC The Baroness

45118 - A truly gorgeous Dorothy Fennell, sepals and petals white, edged with
lavender; lip bright rose, gold-veined.
The Baroness - sepals and petals light yellow, edged with lavender; lip very
large, ruffled, nearly white. This cross should produce unusually fine orchids.

6. HIC Dorothy Fennell 45126 X C. Bowringiana 45110

45126 - A large, bold, well-shaped Dorothy Fennell of great substance. Dark
mauve; large lip, marked with brilliant yellow.
45110 - This Bowringiana parent very strong, carrying 18 dark - almost violet -
flowers on a single spike. This cross should produce excellent, commercial
flowers.

7. HIC Dorothy Fennell 45140 X C. Fortia 45143

45140 - Specially strong growing Dorothy Fennell; sepals and petals wide,
nearly white; large lip, gold and rose.
45143 - Cluster of good dark flowers on the Fortia (C. labiate X C. Bowringiana).
This cross should throw a wide variation of shades: dark, light and inter-
mediate, producing a strong growing commercial type.

8. HIC Dorothy Fennell 45134 X L. Anceps 45135

45134 - Sepals and petals light mauve; lip dark.
45135 - L. Anceps of a good dark variety.

9. L. Anceps 45148 X C. Trianae 45148

Good varieties of winter-flowering species.

10. L. Anceps 45148 X Brassavola eliana 45147

Too small for commercial use but should have good color and substance.

WHILE WE TAKE EVERY PRECAUTION TO SHIP ONLY THE HIGHEST QUALITY SEED, OBVIOUSLY
WE CAN MAKE NO GUARANTEES AS TO THE RESULTS YOU MAY OBTAIN FROM THEM.

Orchid Seed List # 2

- | | Per Packet |
|--|------------|
| 11. <i>Phalaenopsis Rimestadiana</i> 46305 x <i>Phal. Confirmation</i> 46300 | \$12.50 |
| Two beautiful large varieties used here. <i>Rimestadiana</i> 46305 is large, heavy and pure white while <i>Confirmation</i> is equally large and heavy but pink. The cross should produce large light pink flowers. | |
| 12. <i>Phalaenopsis Schilleriana</i> 46301 x <i>Phal. Confirmation</i> 46300 | 12.50 |
| A very dark <i>Schilleriana</i> with a large <i>Confirmation</i> were used here. This cross should be floriferous and medium to dark pink. | |
| 13. <i>L. C. G. S. Ball</i> 46311 x <i>C. Guatemalensis</i> | 7.50 |
| <i>L. C. G. S. Ball</i> 46311 is a beautiful pure orange colored <i>L. C.</i> with from 6 to 8 flowers in a cluster. It is spring blooming. Flowers about $3\frac{1}{2}$ to 4 inches in diameter.
<i>C. Guatemalensis</i> is a strong growing cattleya of the cluster flowered type with flowers that are lavender suffused with orange. 12 to 15 flowers to the cluster, each flower $2\frac{1}{2}$ to 3 inches in diameter. This cross should make a beautiful bright cluster with flowers in shades of orange. | |
| 14. <i>C. trianae</i> var <i>Mary Fennell</i> 46245 x <i>BLC Dorothy Fennell</i> 46273 | 15.00 |
| This is the best dark <i>trianae</i> we have ever seen and the <i>BLC Dorothy Fennell</i> is a magnificent large ruffled flower with dark lavender sepals and petals and a handsome dark lip. This should give some beautiful dark winter flowering plants of robust growth. | |
| 15. <i>C. trianae</i> 45206 x self. | 7.50 |
| A very fine light <i>trianae</i> , sepals and petals white, lip rose and gold. Always blooms in December with us. | |
| 16. <i>C. trianae</i> 46213 x <i>C. trianae</i> 46220 | 7.50 |
| No. 46213 has light, nearly white sepals and petals and a bright rose and gold lip, a very beautiful <i>trianae</i> . No. 46220 is very dark and beautifully shaped - one of our very best dark <i>trianae</i> s. Both flower regularly in December with us. This seed should give a full range of <i>trianae</i> color except pure white while the flowers should all have excellent shapes. | |
| 17. <i>C. trianae</i> <i>Mary Fennell</i> x <i>C. trianae</i> 46288 | 10.00 |
| The glorious variety <i>Mary Fennell</i> is here crossed with another exceptionally dark and brilliant flower with prominent tip blotches of crimson on the petals. Should produce very dark, December blooming flowers of excellent shape. | |
| 18. <i>BLC Dorothy Fennell</i> 46217 x <i>C. trianae</i> 46220 | 12.50 |
| A very beautiful medium lavender colored <i>Dorothy Fennell</i> with flowers of great substance and heavy ruffling on the petals crossed with a fine dark <i>trianae</i> . Should produce excellent dark flowers mostly in winter. We liked this so well we have two pods of it. | |
| 19. <i>BLC Dorothy Fennell</i> 46239 x <i>C. trianae</i> 46240 | 12.50 |
| Another fine cross of these two excellent parents. <i>Dorothy Fennell</i> 46239 is large, well held and medium lavender, lip dark with brilliant yellow eyes while <i>trianae</i> 46240 is very dark, round and well held. | |

A very fine light *trianae*, sepals and petals white, lip rose and gold. Always blooms in December with us.

7.50

16. *C. trianae* 48313 x *C. trianae* 48320

No. 48313 has light, nearly white sepals and petals and a bright rose and gold lip, a very beautiful *trianae*. No. 48320 is very dark and beautifully shaped - one of our very best dark *trianae*. Both flower regularly in December with us. This seed should give a full range of *trianae* color except pure white while the flowers should all have excellent shape.

10.00

17. *C. trianae* *Mary Fennell* x *C. trianae* 48388

The floriferous variety *Mary Fennell* is here crossed with another exceptionally dark and brilliant flower with prominent tip blotches of crimson on the petals. Should produce very dark, December blooming flowers of excellent shape.

15.50

18. *Bic Dorothy Fennell* 48317 x *C. trianae* 48380

A very beautiful medium lavender colored *Dorothy Fennell* with flowers of great substance and heavy ruffling on the petals crossed with a fine dark *trianae*. Should produce excellent dark flowers mostly in winter. We liked this so well we have two pods of it.

15.50

19. *Bic Dorothy Fennell* 48338 x *C. trianae* 48340

Another fine cross of these two excellent parents. *Dorothy Fennell* 48338 is large, well held and medium lavender, lip dark with brilliant yellow eyes while *trianae* 48340 is very dark, round and well held.

- | | Per Packet |
|---|------------|
| 20. BLC Dorothy Fennell 46217 x C. trianae 46237
A cross between two beautifully shaped parents both of which have medium lavender sepals and petals and brilliant gold and crimson lips. Should be excellent - both parents choicest types. | \$ 12.50 |
| 21. C. trianae var Mary Fennell 46231 x BLC Dorothy Fennell 46217
Our best dark trianae on the fine Dorothy Fennell 46217. Should produce some exceptionally choice blooms. | 12.50 |
| 22. C. trianae 45207 x (C. aurantiaca x B. glauca) 45208
An unproven white trianae crossed with the golden yellow hybrid between aurantiaca and glauca which has great substance. These may be yellow, pink or pink suffused with yellow. Flowers probably will be small but will have heavy texture. | 5.00 |
| 23. Laelia anceps x (C. aurantiaca x B. Glauca)
Should be an interesting novelty with yellow shades. | 2.50 |
| 24. C. trianae 46220 x BLC Dorothy Fennell 46219
It's a toss-up whether this cross or No. 14 will give us the best dark flowers. Both these parents are very dark, beautifully shaped flowers, petals ruffled and the Dorothy Fennell has great substance. Lips dark, with brilliant gold markings. | 15.00 |
| 25. C. trianae 45108 x C. General Jacques 45178
A good medium lavender trianae with a dark lip; General Jacques 45178 is one of our best hybrids - excellent shape, brilliant lip and medium lavender sepals and petals, well held. | 12.50 |
| 26. C. trianae 45180 x C. General Jacques 45178
A very choice medium lavender trianae with heavily ruffled petals and a brilliant gold and crimson lip crossed on the General Jacques described above. Should be a choice commercial. | 12.50 |
| 27. C. trianae 45108 x BLC Dorothy Fennell 45167
A choice medium lavender trianae crossed with an excellent Dorothy Fennell with light, well held sepals and petals and a large fine lip. Shapes and substance of both parents excellent, colors light to medium. | 12.50 |
| 28. C. trianae 4419 x LC Eva Shill 4590
Trianae 4419 is a large broad flower of dark lavender color with brilliant dark lip while Eva Shill 4590 is deep purple with brilliant yellow markings in throat. Petals of both the trianae and Eva Shill beautifully ruffled. This should be one of our best dark cattleyas. | 15.00 |
| 29. C. trianae 45202 x LC Eva Shill 4590
Another fine dark trianae crossed with Eva Shill which we believe to be one of our best dark cattleyas. These plants should be fine. | 15.00 |
| 30. C. trianae 45206 x BLC Dorothy Fennell 45197
Both parents of this cross are white or nearly so. Trianae 45206 is described under No. 15; BLC Dorothy Fennell 45197 has white sepals and petals with light lavender and gold in the throat. A goodly proportion of these plants should be whites. | 12.50 |
| 31. C. trianae alba 46211 x BLC Dorothy Fennell 45197
A pure white trianae crossed with one of the whitest Dorothy Fennells we have. This should be good. | 15.00 |
| 32. Vanda tricolor var Patersonii 46272 x Vanda Caerulea 45210
A fine tricolor crossed with one of our best caeruleas, which has large dark blue flowers. Should have great vigor, interesting color, texture and shape. We will have only a few packets of this. | 15.00 |
| 33. Vanda tricolor var Patersonii 46272 x Renanthera coccinea 45118
This should make a fine red or near red flower of good vigor and free flowering habit. Only a few packets will be available. | 15.00 |
| 34. Renanthera coccinea x self. A beautiful crimson and scarlet monopodial orchid - requires plenty of light to bloom well. | 5.00 |

For 1937
\$ 1.00

Fennell Orchid Company

Page 2

30. BIC Dorothy Fennell 48317 x C. trianae 48337
A cross between two beautifully shaped parents both of which have medium
lavender sepals and petals and brilliant gold and crimson lips. Should be
excellent - both parents choicest types.
31. C. trianae var Mary Fennell 48331 x BIC Dorothy Fennell 48317
Our best dark trianae on the line Dorothy Fennell 48317. Should produce
some exceptionally choice blooms.
32. C. trianae 48307 x (C. aurantiaca x B. glauca) 48306
An unproven white trianae crossed with the golden yellow hybrid
aurantiaca and glauca which has great substance. These may be yellow, pink
or pink suffused with yellow. Flowers probably will be small but will have
heavy texture.
33. Laelia encopa x (C. aurantiaca x B. glauca)
Should be an interesting novelty with yellow shades.
34. C. trianae 48330 x BIC Dorothy Fennell 48319
It's a cross-up whether this cross or No. 14 will give us the best dark
flowers. Both these parents are very dark, beautifully shaped flowers,
petals ruffled and the Dorothy Fennell has great substance.
lips dark, with brilliant gold markings.
35. C. trianae 48108 x C. General Jacques 48178
A good medium lavender trianae with a dark lip; General Jacques 48178
is one of our best hybrids - excellent shape, brilliant lip and medium
lavender sepals and petals, well held.
36. C. trianae 48180 x C. General Jacques 48178
A very choice medium lavender trianae with heavily ruffled petals and a
brilliant gold and crimson lip crossed on the General Jacques described
above. Should be a choice commercial.
37. C. trianae 48108 x BIC Dorothy Fennell 48317
A choice medium lavender trianae crossed with an excellent Dorothy Fennell
with light, well held sepals and petals and a large fine lip. Shape and
substance of both parents excellent, colors light to medium.
38. C. trianae 4419 x LC Eva Shill 4590
Trianae 4419 is a large broad flower of dark lavender color with brilliant
dark lip white Eva Shill 4590 is deep purple with brilliant yellow markings
in throat. Petals of both the trianae and Eva Shill beautifully ruffled.
This should be one of our best dark cattleyas.
39. C. trianae 48308 x LC Eva Shill 4590
Another fine dark trianae crossed with Eva Shill which we believe to be
one of our best dark cattleyas. These plants should be fine.
40. C. trianae 48308 x BIC Dorothy Fennell 48317
Both parents of this cross are white or nearly so. Trianae 48308 is described
under No. 15; BIC Dorothy Fennell 48317 has white sepals and petals with light
lavender and gold in the throat. A goodly proportion of these plants should
be whites.
41. C. trianae alba 48311 x BIC Dorothy Fennell 48317
A pure white trianae crossed with one of the whitest Dorothy Fennell we
have. This should be good.
42. Vanda tricolor var lateralis 48375 x Vanda Gaele 48310
A fine tricolor crossed with one of our best exoniensis, which has large dark
blue flowers. Should have great vigor, interesting color, texture and shape.
We will have only a few packets of this.
43. Vanda tricolor var lateralis 48375 x Rensselaeria coocinea 48118
This should make a fine red or near red flower of good vigor and free
flowering habit. Only a few packets will be available.
44. Rensselaeria coocinea x self. A beautiful crimson and scarlet
monopodial orchid - requires plenty of light to bloom well.
